DANTE

GAMES

WHAT IS DANTE GAMES

Dante Games is a blockchain gaming ecosystem, F2P and W2E (Free to Play and Win to Earn), based on Dante's Divine Comedy. It features an innovative and deflationary circular economy that is self-sustainable in the long term.

LEGEND OF DANTE

NFT MARKETPLACE

A marketplace where you can trade different types of NFTs within the Dante ecosystem with other users!
Sell your fully evolved hero if you wish to do so.

The screenshot displays the Dante NFT Marketplace interface. At the top, navigation tabs include 'MY ASSETS', 'VESTING/CLAIM', 'MARKETPLACE', and 'STAKING SYSTEM'. A user profile in the top right shows '100 DANTES' and a wallet address '1000829 0092309'. The main marketplace section is titled 'MARKETPLACE' and features sub-tabs for 'CREATE A SALE', 'MY LISTING', 'MY PURCHASES', and 'FAVORITES'. Below these are category filters: 'Demons', 'Heroes' (selected), 'Pets', 'Equipment', 'Potions', and 'Spell'. A counter indicates '374.931 Heroes'. On the left, a filter sidebar includes options for 'Rarity' (set to 'Legendary'), 'Element', 'Heroe' (Atalanta, Heracles, Achilles), 'Class' (Warriors, Bards, Rangers, Wizards, Paladins), and 'Ability'. The main display is a grid of hero NFTs, each priced at '\$2.500.000' with a '25' icon. The grid shows two rows of five items. The first item in the top row is a female hero (Atalanta) with a 'LEVEL 72' badge. The second item is a male hero with a 'Skill Tittle (Companion)' and a description: 'This is the description of the effect that this demonic ability does. This is the description of the effect that this demonic ability does.' and a 'LEVEL 32' badge. The third item is a male hero with a 'LEVEL 13' badge. The fourth item is a female hero with a 'LEVEL 72' badge. The fifth item is a female hero with a 'LEVEL 72' badge. The second row shows similar items, with the fourth item displaying an 'Experience 152485' tooltip. Each item has a '25' icon in the top right corner.

GAMES

Our ecosystem's games will be agnostic, eliminating the entry barrier for all Web2 users to enjoy and transition to Web3. **These games will be of high quality, enjoyable, and entertaining,** providing a seamless experience for both traditional and blockchain gaming enthusiasts.

HELLMASTER

HellMaster is a role-playing and fantasy card game based on Dante's Divine Comedy with some features reminiscent of Texas Hold'em, making it a dynamic, fun, and immersive experience. This strategic game relies on skill rather than luck for success.

Choose a mythological hero and create optimal combinations with the demons on the board to claim all your opponent's souls and achieve victory.

Players engage in thrilling duels that blend the casting of entertaining spells and magical abilities with the art of bluffing to deceive opponents.

Grow your hero to level 100, shaping them with various spells, weapons, shields, armor, and unique skills. Enhance their stats, attributes, and unlock new features as you progress. Each environment serves as a battlefield inspired by Dante's 9 circles of hell, progressively unlocking as you level up.

HELLMASTER

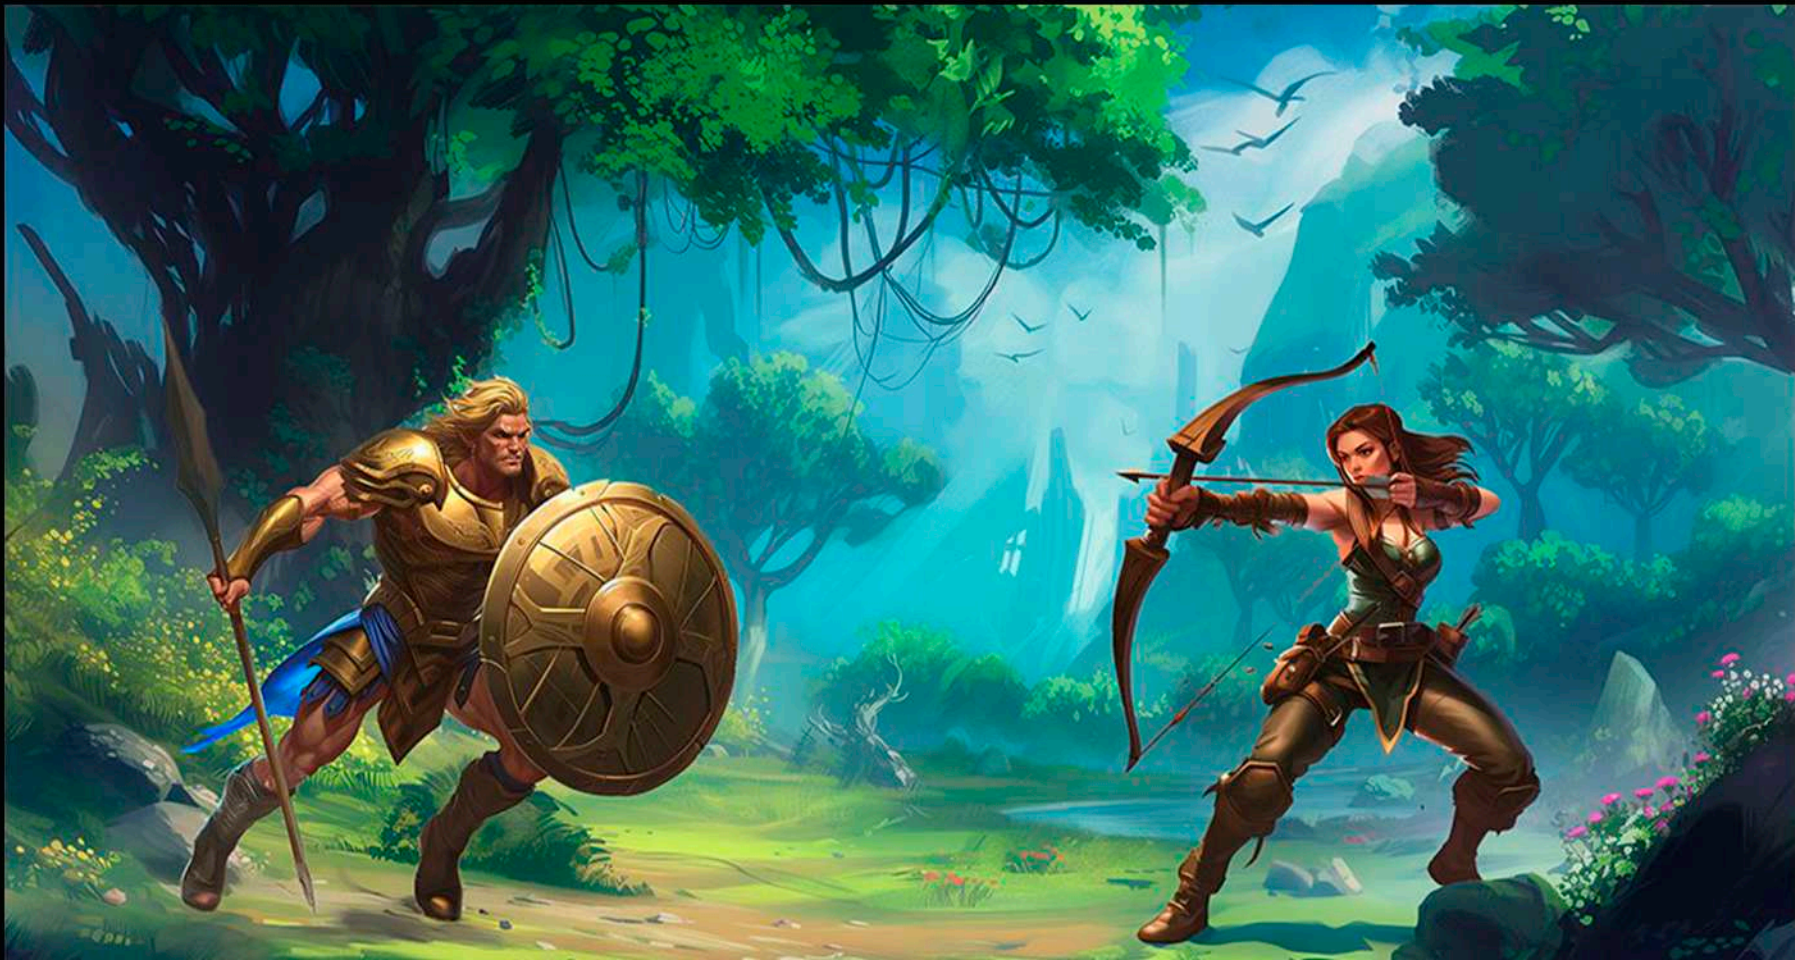

Play with friends, compete in grand tournaments with **thousands of players worldwide**, and climb the seasonal rankings to win substantial prizes, aiming to become the next HellMaster.

ETERNAL FIGHTERS

Eternal Fighters is an exhilarating fighting game that challenges your skills, immersing you in an intense experience through Dante's circles of hell.

Face off against players worldwide in online tournaments to prove yourself as the champion of the underworld. Battle to redeem or condemn your soul! Exciting prizes await you!

INFERNAL BASTIONS: DIVINE DEFENSE

Infernal Bastions is a real-time strategy game based on Dante's Inferno, **combining elements of Deck Building and Tower Defense.**

Choose a hero from Greek mythology and build your card deck with different creatures to challenge other players in epic online battles. **The goal is to destroy the opponent's fortress and achieve victory.**

Destroy your opponents' bastions, **compete in tournaments against players worldwide**, and seize victory to claim substantial rewards!

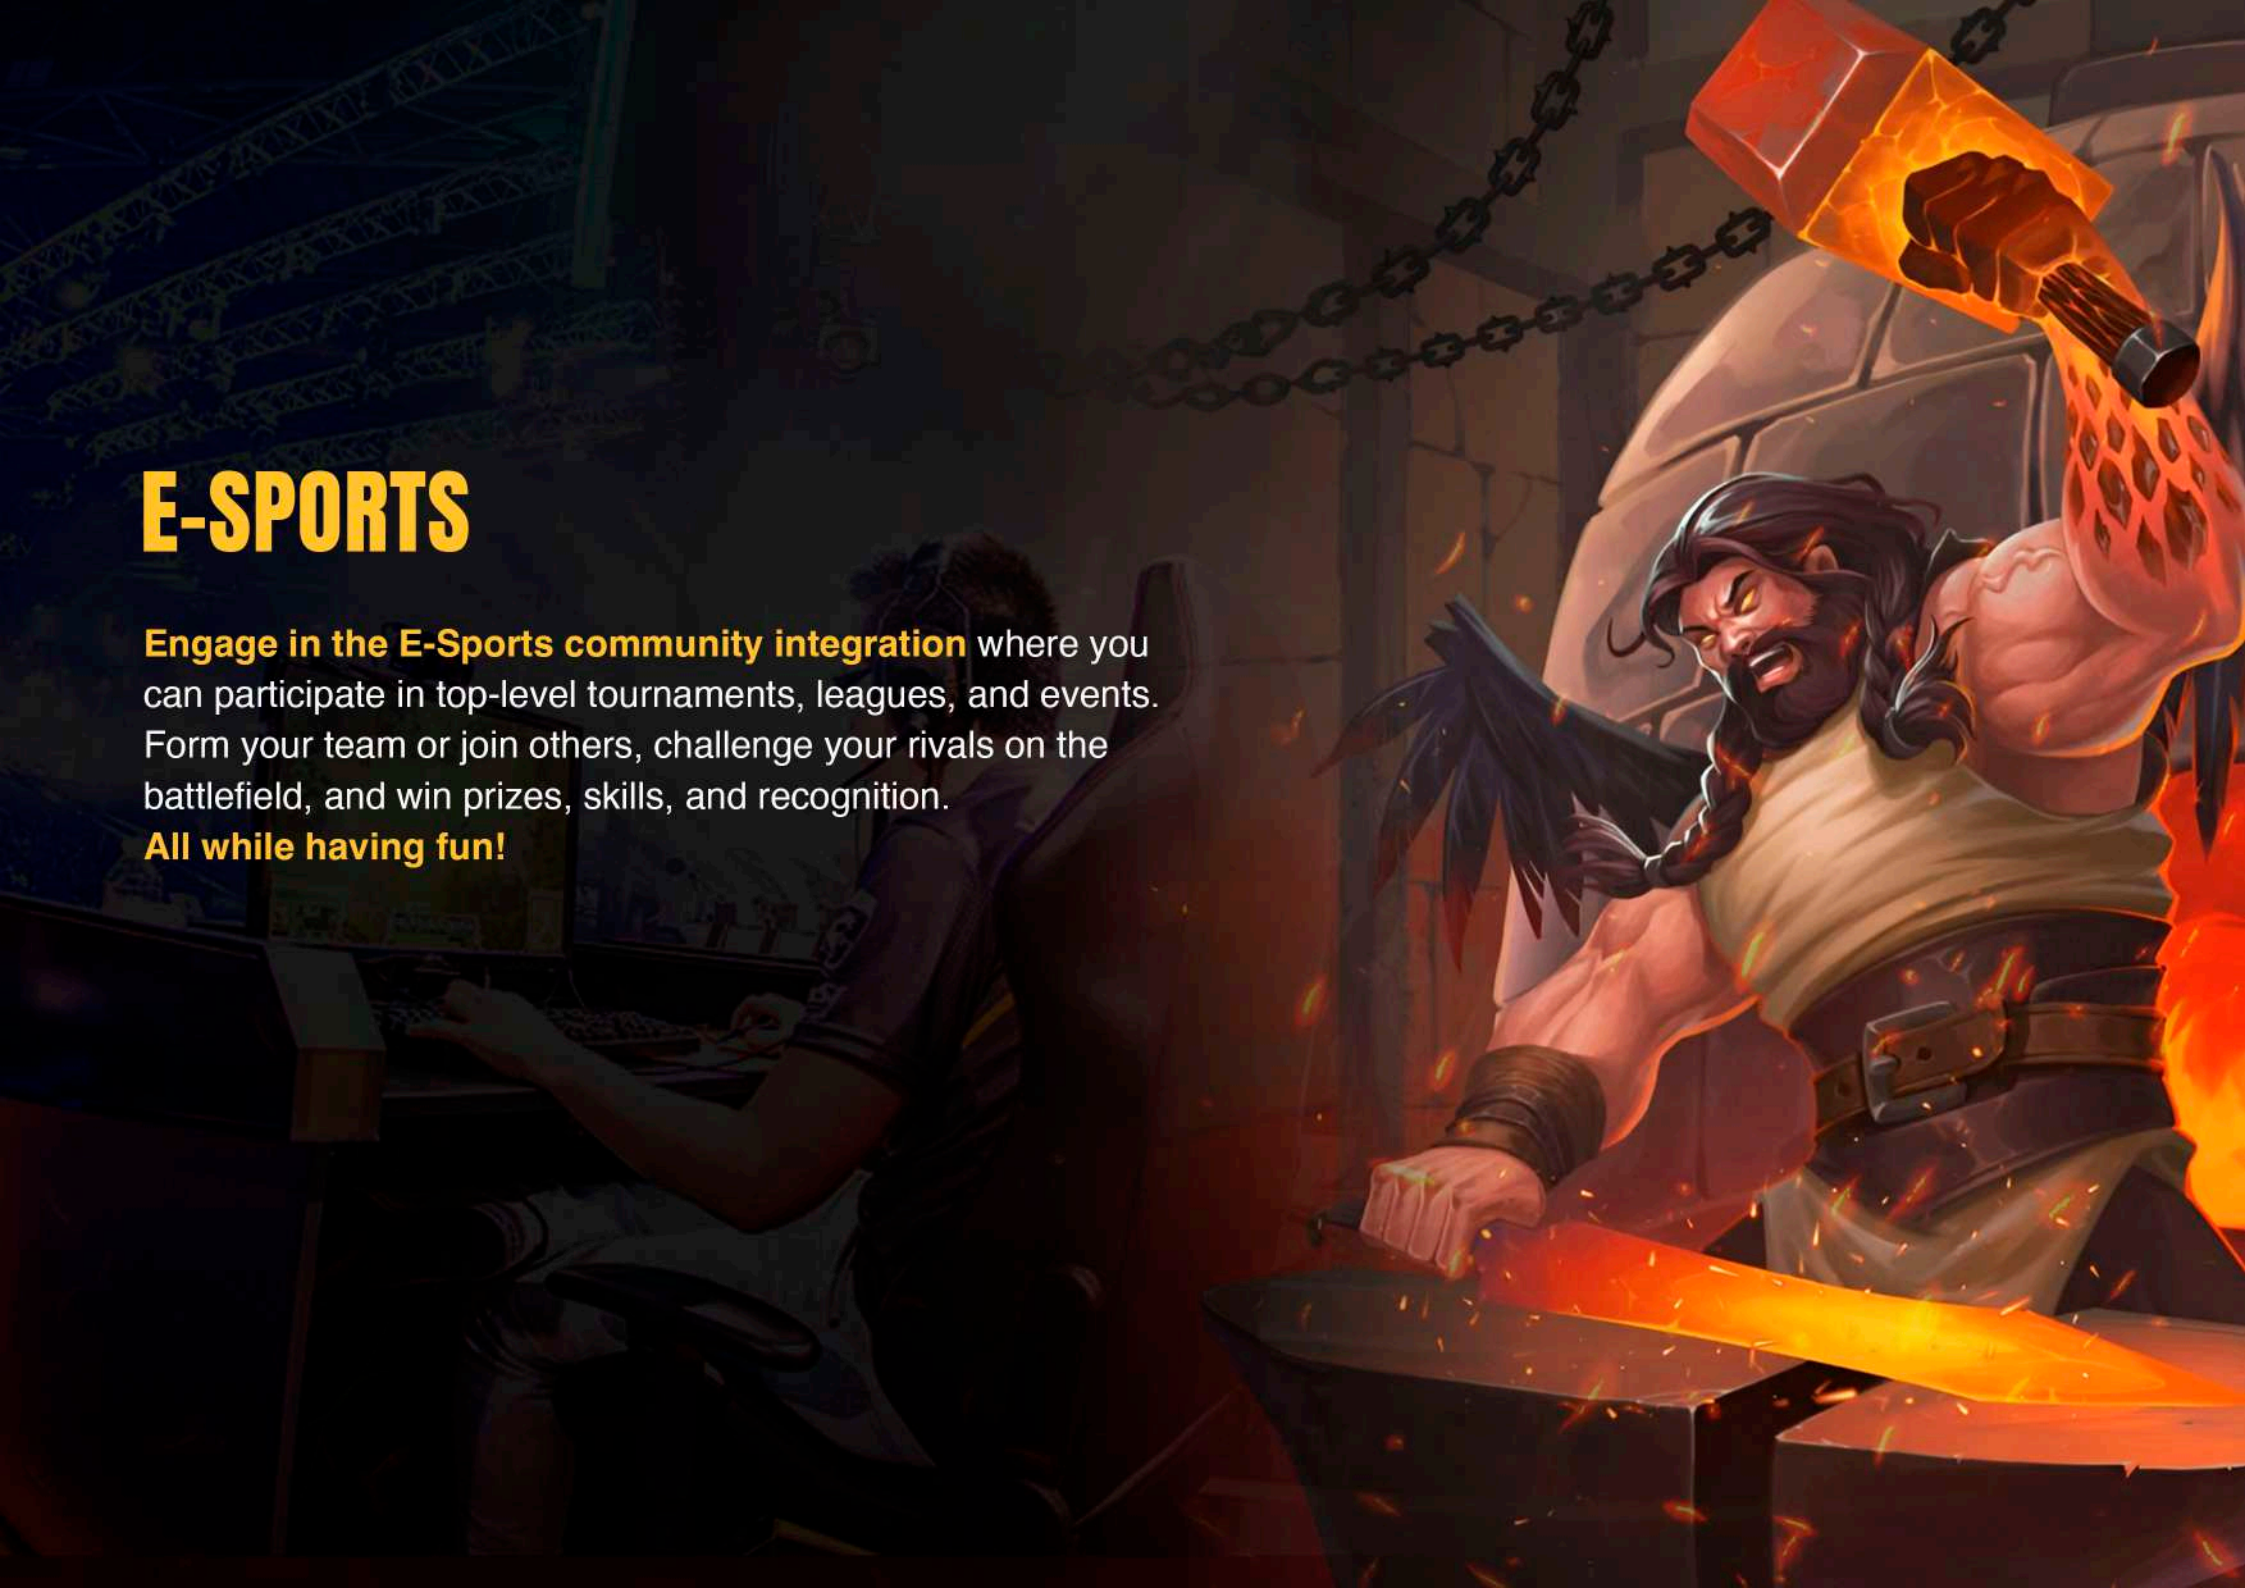

MORE TO COME!!

E-SPORTS

Engage in the E-Sports community integration where you can participate in top-level tournaments, leagues, and events. Form your team or join others, challenge your rivals on the battlefield, and win prizes, skills, and recognition.

All while having fun!

ARTIFICIAL INTELLIGENCE

Integration of an AI assistant in Dante Games' ecosystem, introducing new functionalities and advantages. The AI assistant is integrated into our ecosystem and web app, streamlining entry and interaction with all web app features.

It allows users to obtain information, navigate, and execute operations through text or voice, eliminating entry barriers for Web2 users.

CIRCULAR AND DEFLATIONARY ECOSYSTEM ECONOMY

The portion of the tokenomics dedicated to the ecosystem (40% of the total) is consistent and sustainable in the long term, as it has been designed as a circular economy tested by various algorithms created by specialists. **In addition to outgoing flows, there are incoming flows of \$DANTE.**

This means that, in addition to being sustainable and consistent in the long run, as the user base of our ecosystem grows and more players join, **the \$DANTE rewards from tournaments and seasons will also increase!**

INCOMING FLOWS:

- NFT Sales: 60% company, 25% ecosystem, 15% Burned.
- Marketplace Transaction Fee: 5% (2.5% company, 1.5% ecosystem, 1% Burned).
- Battle Arena Match Fee: 5% (2.5% company, 1.5% ecosystem, 1% Burned).

OUTGOING FLOWS:

- APY Staking for holders.
- **Guaranteed rewards** for top-ranked players in seasons.
- Tournaments organized by the company with guaranteed rewards.

The economic model will be deflationary since a portion of each game played or transaction within the ecosystem will be burned, reducing the available tokens in circulation and increasing the token's value in the long term.

REWARDS

There are two types of rewards to be obtained within our ecosystem:

MONETARY PRIZES WITH \$DANTE

These can be earned through tournaments with guaranteed rewards organized by the company, during seasons, or by challenging other players in the Battle Arena mode.

XDANTE POINTS FOR OUR ECOSYSTEM

A reward for our holders and the most active users in the ecosystem. You can primarily earn xDante Points by staking \$Dante and playing Dante Games.

Some of the utilities of xDante in the ecosystem include:

- Access to weekly tournaments organized by the company with guaranteed rewards.
- Seasonal ranking classification based on xDante.
- The opportunity to obtain exclusive NFTs to enhance your skills in Dante Games. The NFTs available through xDante include Pets, weapons, spells, armor, helmets, shields, etc.

GAME MODES

ADVENTURE

Enjoy Dante Games' F2P (Free to Play) **adventure mode**, where you can progress through stages, unlock new worlds, evolve your heroes, and compete against other players. **Earn xDante points along the way!**

BATTLE ARENA

In this mode, **engage in thrilling battles against other users, challenge friends, and create your own tournaments**. Challenges will be in \$DANTE, with the ultimate prize going to the winner of the battle or tournament (W2E Win to Earn). The winner will also earn xDante points.

COMMISSION

COMPANY TOURNAMENTS

Weekly tournaments organized by Dante Games with incredible guaranteed rewards in \$DANTE and xDante points! Access these tournaments through xDante points, which you can earn through staking and our games.

There will also be seasons in Dante Games, **where top-ranked players will win substantial prizes in \$DANTE and xDante points!**

MARKET

GAMING AND ESPORTS

The global gaming market is projected to reach a value of \$256.97 billion by 2025.

CRYPTO

Access to one of the most liquid markets globally, which reached a market capitalization of over \$2.5 trillion in the last bull run in 2021. It has experienced a growth of over 20x between 2019 and 2022. The market capitalization is expected to surpass \$5 trillion by the year 2025.

NFTS

A market on a continuous upswing, reaching a capitalization of \$7 billion in 2022. Influential voices in the sector anticipate it exceeding \$35 billion by 2025.

PROBLEMS

TRADITIONAL GAMES

Gamers cannot monetize their skills, nor do they have ownership of the elements they buy or obtain within the game.

CURRENT BLOCKCHAIN GAMES AND NFTS

Currently, there are **three significant problems** in the blockchain games and NFT industry:

- **The games are not enjoyable and entertaining**, often featuring mediocre quality masked by promises of significant rewards.
- **The current Play-to-Earn system lacks consistency, as it distributes tokens merely for playing, resulting in constant inflation that affects token prices, the economic system, and investors' wallets.** Play-to-Earn games with a dual-token economy generate distrust.
- **The crypto economy of current blockchain games is not sustainable in the long term**, as they allocate a portion of total tokens for rewards, exclusively for a specified period. Consequently, many systems will face the serious problem of a weakened economy for players to monetize the game, **leading to solutions involving a comprehensive restructuring of the game economy, such as creating new tokens, with the corresponding inflation.**

SOLUTION = DANTE GAMES

Dante Games presents a gaming ecosystem of exceptionally high quality—**tremendously addictive, entertaining, and fun**—crafted by and for gamers.

Implemented with a Win-to-Earn (W2E) system, there are incentives for players in all game modes. However, to monetize and earn \$DANTE rewards, players must emerge victorious in battles against other users or secure top rankings in seasons and **tournaments with guaranteed rewards organized by the company**.

Circular economy. The token pool of the ecosystem will feature both **incoming and outgoing token flows**, creating a consistent and sustainable economy and ecosystem in the long term.

TOKEN UTILITIES

-  Users must possess \$DANTE to participate in battles or regular tournaments against other users (W2E).
-  Company tournaments with guaranteed rewards for \$DANTE holders through a staking system.
-  \$DANTE holders can acquire specific NFTs and other exclusive rewards through staking.
-  Perpetual staking with APY for holders.
-  Purchase and sale transactions in the marketplace can be conducted using \$DANTE.
-  Acquisition of specific NFTs through \$DANTE.
-  Token burning of \$DANTE, making it deflationary.

ROADMAP

2024 Q1

- LAUNCH OF A NEW WEBSITE.
- INTRODUCTION OF A NEW DECK
- DEMO HELLMASTER GAME

2024 Q2

- PUBLIC ALPHA RELEASE HELLMASTER GAME
- LAUNCH BETA WEB APP
- TOKEN GENERATION EVENT (TGE)

2024 Q3

- BETA RELEASE OF HELL MASTER WITH INTEGRATED BLOCKCHAIN AND CIRCULAR ECONOMY
- WEB APP FULL RELEASE
- SALE OF NFT COLLECTIONS.

2024 Q4

- FULL RELEASE HELL MASTER GAME
- FULL RELEASE WEB APP
- COMMENCEMENT OF SEASONS AND TOURNAMENTS WITH GUARANTEED PRIZES BY THE COMPANY

2025 Q1

- INTRODUCTION OF NEW NFT COLLECTIONS
- MOBILE VERSION RELEASE HELLMASTER GAME
- UPDATES ON ETERNAL FIGHTERS AND INFERNAL BASTIONS: DIVINE DEFENSE GAMES
- NEW UTILITIES FOR \$DANTE AND XDANTE

2025 Q2

- INTRODUCTION TO OUR DANTE AI ASSISTANT DANTE
- INTRODUCTION TO OUR NEW FEATURES FOR E-SPORTS
- DEMO ETERNAL FIGHTERS GAME

2025 Q3

- BETA RELEASE ETERNAL FIGHTERS GAME
- INTEGRATION OF POTENTIAL NEW GAMES AND ECOSYSTEMS INTO DANTE GAMES

2025 Q4

- FULL RELEASE ETERNAL FIGHTERS GAME
- DEMO INFERNAL BASTIONS: DIVINE DEFENSE GAME

And much more!

TEAM

A team with extensive expertise in video game development, technology, and crypto markets, currently consisting of over 25 professionals. We have been dedicated to advancing the project for over 2 years using our own resources, underscoring our commitment and engagement with the initiative. This enables us to allocate a significant portion of our tokenomics (40%) directly to what truly matters: **our ecosystem, ultimately benefiting our gamers and community.**

SERGIO MORILLO

Sergio. Founder & CEO. CoFounder y CTO Xaloc Studios. More than 15 years of experience in the video game sector.

LEÓN SAGAN

Co-Founder & Lead Game Designer. Creation of lore, characters and game mechanics
